Review

New pipeline

Review your pipeline YAML

◆ Sample02 / azure-pipelines.yml \* 🔍

```
1 # Starter pipeline
2 # Start with a minimal pipeline that you can customize to build and deploy your code.
3 # Add steps that build, run tests, deploy, and more:
4 # https://aka.ms/yaml
5
6 trigger:
7   - main
8
9 pool:
10  | vmImage: ubuntu-latest
11
12 steps:
13   - script: echo Hello, world!
14     | displayName: 'Run a one-line script'
15
16   - script: |
17     | echo Add other tasks to build, test, and deploy your project.
18     | echo See https://aka.ms/yaml
19     | displayName: 'Run a multi-line script'
20
```

## Cambiar el tipo de proceso a Basic Agile

### Change the project process

Change the process used by the project to another process.

**Warning!** You must update your work items and board settings or they will appear broken.

**Complete**  
This project is now using the Agile process.

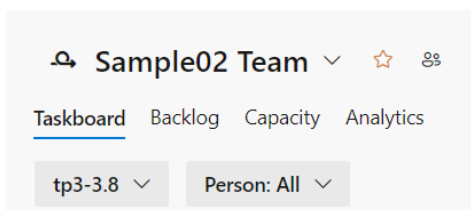

#### Steps to manually update your work items and board settings:

1. Update the column to state mapping for each Team Kanban Board.
2. Update existing work items using the right work item types set by the target process.
3. Update existing work items using the correct state model in the target process.
